

# HOME CHALLENGE

*Who is your favourite Superhero? Why?*

*What are their special powers?*

*Create an information page about your favourite superhero using headings, subheading, diagrams and paragraphs of information.*

ENGLISH We will explore a range of story about Superheroes, eg Superkid by Claire Freedman and Tuesday by David Weisner.

We will look at the characters in the stories and select WOW words to define and talk about.

We will sequence the events and look at how they are linked through the story in order to help us retell them.

SCIENCE Working Scientifically

We will conduct a range of simple experiments. EG, Which is the best material to choose for Supergirl's cape? What is the strongest material to hold the Hulk?

We will record what we have found out and present our findings to others using labelled diagrams and writing.

MATHS Problem solving.

We will explore how to solve a range of problems in a variety of contexts – time, shape, calculation, number, etc.

We will explore how others solved the problem and each child's reasoning.

Eg The Joker robbed a bank and stole £100 in two money bags, how much could be in each bag?

## SUPERHEROES

TOPIC D+T – How to make pictures move with simple mechanisms in order to create a moving superhero picture. Art – Exploring comic book art and the work of Lichtenstein. RE – Special books and how to take care of them.
